Open May 8 through October
Open late 7 days a week

Hostas are shipped from April to October. Hostas shipped in April will always be dormant plants with no top growth. Hostas begin to sprout here in May, some later than others, so shipments in early to mid May might contain plants that are still dormant along with others that have begun to sprout. Actively growing plants are sent with the roots wrapped in paper towel. Hostas shipped from late May through the summer are sent fully leafed out, so if you only want leafed out hostas please schedule your shipment no sooner than Memorial Day. We do not force our plants, so remember, if you live in the South your growing season is at least two months ahead of our plants here in Michigan.

We will include growing instructions with your shipment. If you have any questions about shipping, packaging, how your plants will arrive, or how to plant upon arrival, please call or email us at any time.

Plants sizes (W x H) are estimates based on size listed in the registration. Actual size will vary. * = new for '09
